9. There were elective courses in the Medical School. One elective strongly recommended to the students was Eye, Ear, Nose and Throat Course for two semesters.

50X1

- 10. From 1946 to 1949 there were also required courses in Social Science, two hours each week and the Russian Language, two hours weekly. In the Social Science class, such topics as Marxist theory were taught.
- 11. There were many demands made on the time of the medical students. Everyone volunteered for political work, such as canvassing neighborhoods, attending political rallies and helping to clean the rubble in the streets. Some political meetings were held as early as 6:00 AM.
- 12. I used the word "volunteered" advisedly, because it was generally believed that by performing political work, they were making life easier for themselves.
